54DH4 21.5 INCH CYLINDER MOWER

Any professional groundsman will tell you that a quality lawn with a velvety close-cut pile can only be achieved by regular mowing with a cylinder mower. The grass leaf is cut with a scissor-like action between the precision-ground cylinder and the equally precision-ground bottom blade. Also, cylinder mowers cut lower than rotary mowers, hence the use on bowling and golf greens and tennis courts and croquet lawns.

Regular cutting using a quality Australian-made Alroh mower reduces the invasion of coarse grasses and weeds, leading to a strong and healthy dense grass sward.

Features

- * Steel constructions, fully protected by the powder-coated finish.
- * Sheffield steel cutting blades to hold their cutting edge the longest.
- * Precision-ground Japanese sealed bearings for reliability and reduced maintenance.
- * Light-weight steel catcher to collect clippings.
- * Split rear roller with differential drive.
- * Specially spec'd with "9-blade" reel and "greenkeeper" bottom blade.
- * Powered by a Commercial-grade 5.5hp Briggs and Stratton engine.
- * Dual clutch control. *Drive ON, blades OFF – Drive OFF, blades ON*
- * One-piece steel front roller with bearings.
- * 3 year residential warranty, subject to annual servicing by an Authorised Dealer.
- * **Other options by order – two different Honda Engines.**

\$3,495 Proudly Australian-made.

Price includes assembly, pre-delivery, blade setting and local delivery and instructions on use and maintenance.
