Blades length	271mm(10 ² / ₃ "
Cutting Depth	75mm(3")
Gear box reduction	3.54:1 Hardened spiral bevel gears

Full instruction/user manual supplied with each unit.

Atom's innovative patented Lawn Edger **is the world's only Gold Medal winning lawn edger**. It's unique breakthrough design was awarded the **Gold Medal** at the prestigious International Inventions and New Technology Convention in Switzerland in 1997.

The Atom Deluxe model lawn edger is a premium model lawn edger suitable for the home owner. Its luxury features include a quality, easy to start, quiet operating Honda 25cc 4-stroke engine that is very fuel efficient and has low exhaust emissions. There is no having to mix oil with petrol.

It also features comfortable Bio-Rubber handle grips that make using the edger a pleasure. Its highly manoeuvrable wheelbarrow action means you can edge along curbs and gutters, around tight corners, garden plots, and by simply tilting the edger sideways you can edge up against walls and fences. The edger requires no bending or carrying

The Atom Deluxe Edger is also suitable for the elderly, or people with back problems as there is no carrying or bending required. It is also light-in-weight, and can be stored away taking up very little room. The long 271mm (10²/₃") hardened spring steel 4-blade cutting system gives smoother operation and lasts a long time. Also, Atom's blades length are longer than industry standard thus adding even further longer life to the 4-blade cutting system.

The Atom Deluxe Lawn Edger also has numerous safety features including a safety throttle trigger interlock system, fully enclosed transmission, enclosed blade guard, and automatic safety clutch.
