

ATOM TURBO ELECTRIC LAWN EDGER

(PATENTED)

EASY TO USE

DOUBLE INSULATED ELECTRICAL SYSTEM

Trigger throttle with safety interlock

Powerful turbo-cooled all ball bearing electric motor

Anchored extension chord allows chord to follow operator

EXCLUSIVE TO ATOM
Electric motor automatic safety clutch to prevent motor burning out

Cross brace for extra stability

6 position height adjustment

Reinforced super-strength polymer casing

Large fully enclosed blade guard

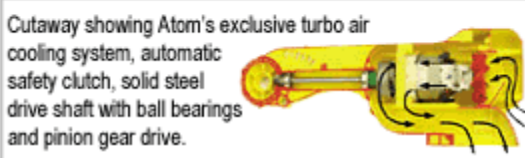

Fully enclosed 12mm solid steel transmission shaft

Edge guide

Large 150mm (6") rubber tyre wheel

Debris deflector shield

Long lasting 4 Blade cutting system. Blade life double our nearest competitor. Cross blades easy to replace. (patented)

BENEFITS	MODEL SPECIFICATIONS	ELECTRIC LAWN EDGER
-----------------	-----------------------------	----------------------------

- **Light-in-weight**
- **Strong robust construction**
- **Long Lasting 4-blade cutting system**
- **Affordable quality with long life**
- **Cuts neat edges everywhere**
- **Edges anywhere including round corners and curbs and gutters**
- **Environmentally friendly due to speed of job completion, low energy consumption, economical 4-blade cutting system**
- **Safety features throughout**
- **Quality Engineering**
- **Durable quality lawn edger with long life will outlast all other brand electric lawn edgers.**

Model	Atom Electric
Motor	1250W
Weight	7kg (15.7lbs)
Blades Length	241mm (9 ¹ / ₂ ")
Cutting Depth	65mm(2 ¹ / ₂ ")
Gear box reduction	3.54:1 Hardened spiral bevel gears

Full instruction/user manual supplied with each unit.

Designed with the same innovative patented features as Atom's 1997 Gold Medal winning gasoline Lawn Edger this **Atom Electric Lawn Edger (with the world's only electric edger safety clutch system)** was voted **1998 Product of the Year** by Power Equipment Australasia magazine and **WINNER OF THE SILVER/GOLD MEDAL AT THE INTERNATIONAL INVENTIONS CONVENTION IN GENEVA SWITZERLAND** in 1999. This light in weight Atom Electric lawn edger is the world's most advanced electric lawn edger.

Atom's highly maneuverable wheelbarrow action enables the operator to edge quickly and neatly anywhere including round tight corners, curbs and gutters, and garden plots. And by simply tilting the edger sideways you can also edge against walls and fences!

Its exclusive forced (turbo) air cooling system and the only electric edger with an automatic safety clutch minimises the chances of the powerful motor from burning out. Its double insulation means it's safer to use. The long 240mm (9 1/2") hardened spring steel 4 blade cutting system, with integral blade brake, has double the life of our nearest competitor and is easy to replace.

Its fully enclosed transmission with tough 3.54:1 hardened spiral bevel gears and precision gear box reduction smoothly transmits high torque to the long cutting blades and through the toughest grass.

Like our gasoline models, the Atom Electric lawn edger can edge anywhere quickly and easily and requires no carrying or bending.
