

# ATOM PROFESSIONAL 4-STROKE LAWN EDGER

(PATENTED)

WITH ANTI-VIBRATION OPERATOR COMFORT SYSTEM

POWERED by  
**HONDA**

**QUIET &  
LOW FUEL  
CONSUMPTION**

BENEFITS	MODEL SPECIFICATIONS	PROFESSIONAL 4-STROKE
<ul style="list-style-type: none"> <li>• <i>Light-in-weight</i></li> </ul>		

- **Strong robust construction**
- **Very Easy to Start**
- **Very Fuel Efficient**
- **Long Lasting 4-blade cutting system**
- **Affordable quality with long life**
- **Cuts neat edges everywhere**
- **Edges anywhere including round corners and curbs and gutters**
- **Environmentally friendly due to speed of job completion, extremely little fuel use, economical 4-blade cutting system**
- **Safety features throughout**
- **Quality Engineering**
- **Durable quality lawn edger with long life will outlast all other brand gasoline edgers.**

<b>Model</b>	Pro 4-Stroke
<b>Engine</b>	Honda
<b>Displacement</b>	35cc
<b>Power</b>	1.2 Kw (1.6 Hp)
<b>Fuel</b>	Unleaded
<b>Weight</b>	9kg (20 lbs)
<b>Blades Length</b>	271mm (10 <sup>2</sup> / <sub>3</sub> " )
<b>Cutting Depth</b>	75mm (3")
<b>Gear box reduction</b>	3.54:1 Hardened Spiral Bevel Gears

Atom's innovative patented Lawn Edger **is the world's only Gold Medal winning lawn edger**. Its unique breakthrough design was awarded the **Gold Medal** at the prestigious International Inventions and New Technology Convention in Switzerland in 1997. Previously, in 1996, the Atom Professional Edger was voted Product of the Year by Power Equipment Australasia Magazine. In the USA in 2000, Atom also won the OEM MIE Award for the Atom Professional Edger.

The Honda 35cc 4-stroke engine delivers high torque power through Atom's 3.5:1 reduction gear box. The 10 <sup>2</sup>/<sub>3</sub>" (271mm) long patented hardened spring steel 4-blade cutting system can edge the toughest lawns. The blades are made from hardened spring steel and, as a 4-blade cutting system, last a long time. Also, Atom's blades length are longer than industry standard thus adding even further longer life to the 4-blade cutting system. This 4-Stroke engine meets the strict European, USA, EPA and CARB regulations in the USA, making it less polluting to the environment.

The new Atom 4-stroke edger features a 7-point Anti-Vibration System for maximum operator comfort. An integral air deflector/exhaust cover diverts hot air away from the operator and protects the operator from accidentally touching the hot exhaust outlet.

The Atom Professional 4-stroke edger is ideal for professionals, and is very fuel efficient thus saving fuel costs. Home owners who own 4-stroke equipment will also find this model appealing as they do not have to store two types of fuel. It is also easy to start, quiet running and a pleasure to use.

The Atom Professional 4-Stroke edger also has numerous safety features including a safety throttle trigger interlock system, fully enclosed transmission, enclosed blade guard, and automatic safety clutch, and fully functional debris deflector.

Honda is the world's largest volume engine manufacturer and one of the best known engine brand names in the world.
