CROMMELINS are now agents for HIMOINSA ULTRA SILENT GENERATORS.

Himoinsa is a Spanish company founded in 1982. Their generators are built to BVQi quality standards, the most widely recognized independent certification body in the world.

The Himoinsa Model HPW-20 T5 20kVA soundproof generator is powered by a Perkins EPA certified diesel engine and uses a Stamford alternator. It is watercooled – three phase 415v, single phase 240v.

Superior benefits:

Quiet – ultra silent sound proof canopy (63dBA)
 Environmentally friendly – fully bunded fluids prevents external fuel/oil spillage
 Durable – robust anti-corrosive powder-coated steel canopy and stainless steel hinges and door latches
 Safety & Security features – emergency stop button, earth leakage protection and lockable control panels and doors
 Mobility – accessible channels and lifting eye

Applications: Construction Sites, Housing, Tourist services, Communications, Airports, Hospitals, Public works, Mining, Navigation, Agriculture and the entire range of industries...

Other models also available.

	Model HPW-20T5
Rated Output kW	PRP - 20 : Stand By 22
Active power output kW	PRP 16 : Standby 17
Rated speed RPM	1.500
Voltage available	415 / 240
Weight	865 kg
Fuel tank capacity	50 litres
Dimensions (LxWxH)	2.000x950x1.235mm
Perkins engine model	404C-22G
Cylinders	4L
Governor	Mechanical
Aspiration type	Natural
Alternator	Stamford
