Husqvarna®

R13C Articulated Steering Ride-on

Advanced engine technology – Fitted with a high specification 12.5hp OHV Commercial-grade Briggs and Stratton engine, complete with AVS, (anti-vibration system).

Hydrostatic transmission – Foot-controlled system optimizes speed and adds to the manoeuvrability of the mower.

Front-mounted cutting deck – For good visibility that gives you total control over your working area.

“Combi” deck design – A unique deck design that allows mulching or easy conversion to rear discharge. 37” Cut.

Articulated steering – The most superior steering design with a minimum turning radius at full lock.

Height adjustable steering wheel – A telescopic steering column allows adjustment of the steering wheel height.

Central cutting height adjustment – With a lever on the control panel the adjustment is quick and easy.

Cutting deck maintenance – The cutting deck can be lifted quickly and easily to the vertical for maintenance.

Cowl-induction cooling – Draws in cool external air for superior engine cooling.

Rear exhaust discharge – The muffler is situated with the fumes being directed away from the operator.

Cast iron rear weight – It is fitted as the rear bumper for greater stability.

Tow hitch – Fitted to the rear bumper for towing a small trailer.

Adjustable High-back seat – 15” high for back support, and adjusts forward and down, or backwards and up.

Anti-scalp rollers – Large front rollers to allow the cutting deck to follow the contours of the lawn.
