SHINDAIWA T2510 C4 TECHNOLOGY BRUSHCUTTER

With C4 Technology®, the T2510 combines the best of both worlds. You get the light weight, high torque, multi-positioning, and great throttle response of the 2-stroke. And now, include the low engine noise, improved fuel economy, and dramatically reduced exhaust gas emissions of the 4-stroke. The Shindaiwa T2510 is designed especially for the demanding commercial market.

- Japanese quality – Shindaiwa premium 24.5cc 1.1hp (.8kw) engine 5kg
- Shindaiwa C4 Technology with low noise and emission characteristics of a 4-cycle engine.
- Lightweight, heavy-duty, machine-mated aluminium crankcases
- Chrome plated cylinder with two-ring piston design
- Forged three piece crankshaft and con-rod with needle roller bearings at each end.
- Walbro WYL barrel valve carburetor for all position use, and excellent throttle response and fuel metering throughout entire rpm range
- Forced air cooling, discharged away from the operator
- Automatic centrifugal clutch
- Full anti-vibration system
- Carbon steel splined mainshaft
- Aircraft-grade aluminium outer tube
- Heavy duty gearcase with helical gears for smooth power transfer. Better fuel economy, up to 33% longer than equivalent engine capacity 2-stroke units.
- Heavy duty four bolted debris shield
- Now with the new sensational **“Speed Feed”** Trimmer Head

**5 year domestic &
2 year commercial warranty**

\$619
